EXPERIENCE

Mobile app developer

MABU - CIUDAD JUARÉZ, CHIH. MX

2019 - 2020

• I built the "Casas de cambio Juarez" application, for the Frontend I used the Ionic framework in its version 5 and for the Backend I used the Firebase service.

• I developed the tools for direct communication with the exchange houses in order to add them to the application.

• I monitored the performance of the application during the first few weeks of the application deployment.

Programmer

Personal projects

I developed some projects for personal use, like a hardware selection application, a real time chat, a personal blog, and even a videogame from scratch, all the information about it you can find in my website

https://andrescazares.netlify.app/

EDUCATION

Computer Systems Engineering

TECHNOLOGICAL INSTITUTE OF CIUDAD JUÁREZ

2015 - 2020

Online courses

UDEMY - PLATZI - OTHERS

2019 - Present

HOBBIES

I really enjoy playing video games, especially those that require a considerable amount of strategy and logic.

I like to do research on current and relevant topics, both scientific and technological, as well as constantly updating my programming skills.

SUMMARY

I am a computer systems engineer and I focus on web development, I have knowledge in the latest Frontend web technologies, mainly focused on ReactJS and TailwindCSS, I love to keep acquiring knowledge and polishing my skills as a programmer and as an engineer.
